

## SEMAN PERU CONTRACT MAINTENANCE FUNCTIONS LIST

When necessary, SEMAN PERU may contract an outside source to perform a maintenance, preventive maintenance, or alteration of any article for which it is rated in the Operations Specifications (OpSpecs).

SEMAN PERU Repair Station may contract maintenance functions only of these maintenance functions are approved by FAA. The Quality Assurance Manager coordinates with FAA the required authorization.

The contract maintenance functions for SEMAN Peru are the following:

1. Electrical testing
2. Non Destructive Inspection (Magnetic Particle, Liquid Penetrant and Eddy Current)

Other functions can be added to this list on an emergency basis. SEMAN PERU will coordinate closely with its Principal Inspector when these circumstances occur in order to get approval for a new required contracted maintenance function.
